- Implementation of user stories to meet agreed deadlines
- Delivering specialist expertise in the relevant platforms and technologies
- Writing clean, well architected code with comprehensive testing that passes all automated and manual testing and meets the relevant coding standards
- Taking part in all quality processes such as static analysis, unit testing and the delivering and receiving of code reviews
- Creating and maintaining documentation supporting technical designs, decisions and support tasks
- Perform system deployments to test and production environments

EMEA SAP Commerce re-platform -(Epson) United Kingdom

Hybris Contractor, Mar 2021 – Sep 2021

Epson currently has a mix of 36 transactional and non-transactional sites. One of the sites is running Hybris 6.7 on-prem. Epson have decided strategically to move to Commerce Cloud to be the main e-commerce platform for the whole group.

Working as a senior Hybris Developer to implement SAP Commerce's solution For Epson.

Technology Stack

Java 11, Hybris 2011 as commerce platform (CCV2), Spring, ANT, Servlet, JSP, MySQL, GitHub, SourceTree/Fork, RESTful Web Service, JUnits

Responsibilities: ⌞SEP⌟

- Technical architecture of the EMEA SAP Commerce implementation
- Technical delivery
- Implement best practice within the development team
- Technical design and validation of the requirements and stories
- with the client and BAs
- Technical design of the infrastructure, deployment and integration with external systems
- Defect management and working with the external test teams

Newlook-Storefront - United Kingdom

Hybris Contractor, Dec 2020 – Feb 2021

Worked as part of foundation phase to implement SAP headless Commerce's using OCC REST APIs. Worked closely with architect to design and implement the agreed endpoints.

Technology Stack

Java 11, Hybris 1905 as commerce platform, Spring, ANT, Servlet, JSP, MySQL, GitHub, SourceTree/Fork, RESTful Web Service, JUnits, Spock Testing, Rest Assured Testing

Responsibilities: ⌞SEP⌟

- Worked on OpenAPI speciation to develop the Product, CMS Pages and CMS Component's endpoints.
- Worked on development of backend API to be consumed by upstream services. This helps establish the core architectural pattern and sets in train WoW between infra, frontend, backend and QA workstreams.
- Swagger definition for API for Vertical Slice
- Wiremock, Groovy Spock & RestAssured (existing framework) tests for the APIs
- Added the Unit and integration tests using Rest Assured.

  .

Ebay Integration (The Toyshop) – United Kingdom

Hybris Contractor, August 2020 – Nov 2020

Technology Stacks:

Java 1.8, Hybris 6.5 as commerce platform, Spring, ANT, Servlet, JSP, MySQL, GitHub, SourceTree/Fork, RESTful Web Service, Spring Integration

Responsibilities: ⌊SEP⌋

- ☐ Act as team lead of 3 team members.
- ☐ Worked on designing the feeds generation and sending them to eBay SFTP server
- ☐ Worked on Integration of Hybris orders to Ebay
- ☐ Integrated cancellation/Refund order process with Ebay's order
- ☐ Worked on PayPal's refund process for cancellation and refunded orders.
- ☐ Worked on major bugs from current development.
- ☐ Peer code review.

Albus (The White Company)– United Kingdom

Hybris Contractor, Oct 2018 – Apr 2020

As a backend Hybris developer, I mostly worked on Albus project. Albus was focused on replacement of existing backend ERP (NAV) to new Dynamic 365. The role was involved with hybris team to integrate D365 system with Hybris, across the hybris platform including order management, user management, warehouse management etc.

Technology Stacks:

Java 1.8, Hybris 6.7 as commerce platform, Spring, ANT, Servlet, JSP, RESTful Web Services, Spring Integration, MySQL, Mercurial, GitHub, SourceTree/Fork, NodeJS, VUE

Responsibilities: ⌊SEP⌋

- ☐ Design and implemented the integration calls to D365 for various parts of order management.
- ☐ Working on major bugs on from current development and live.
- ☐ Requirement gathering and analysis with BA and product owner.
- ☐ Story estimation.
- ☐ Mentored other developers by guiding them in terms of eCommerce concept, functionality and coding approaches in Hybris.
- ☐ Peer code review

New Website (Rapha) – United Kingdom

Senior Hybris Developer, Dec 2017 – Jun 2018

Rapha is more than just a clothing company – in addition to an online emporium of performance roadwear, accessories and publications, the brand includes physical retail locations, luxury travel, and a cycling club with global membership.

The New Website is an enhancement and platform upgradation of Hybris 6.3 over their previous site. As a senior developer, I have worked on various parts of development phase including checkout, data migration, rule engine, content etc.

Technology Stack:

Java 1.8, Hybris 6.3.0.3 as commerce platform, Spring, ANT, Servlet, JSP, MySQL, GitHub, SourceTree

Responsibilities: [SEP]

- ☐ Responsible for analysis & estimate effort required on the stories.
- ☐ Primarily worked on new rule engine and promotion.
- ☐ Mentored other developers by guiding them in terms of eCommerce concept, functionality and coding approaches in Hybris.
- ☐ Peer code review

FLO – Turkey

Lead Hybris Developer, Apr 2017 – Nov 2017

Barbour – United Kingdom

Lead Hybris Developer, Jul 2016 – Apr 2017

Berry bros & Rudd – United Kingdom

Lead Hybris Developer, Feb 2014 – Jun 2016

The White Company (US Site) - United Kingdom

Senior Hybris Developer, Jul 2013 – Dec 2013

Hybris Platform Upgradation – Victorinox (Switzerland /US Site) – India

Senior Developer, Sep 2012 – Dec 2012

Victorinox Reskinning – Victorinox (Switzerland /US Site) – India

Senior Developer, Jun 2012 – Aug 2012

Multi Country Rollout - Victorinox (Switzerland /US Site) – India   Developer

Feb 2012 – May 2012

eCommerce- implementation – Victorinox (Switzerland /US Site) – India

Developer Feb 2011 – January 2012

Similar few more as above.
